Department of Computer Science and Engineering

Course Project: Snake Game

Week 3 Progress Report

Student Name: Bhuiyan Abdullah Al Rafe

Student ID: 11240321715

Course Title: Software Development I

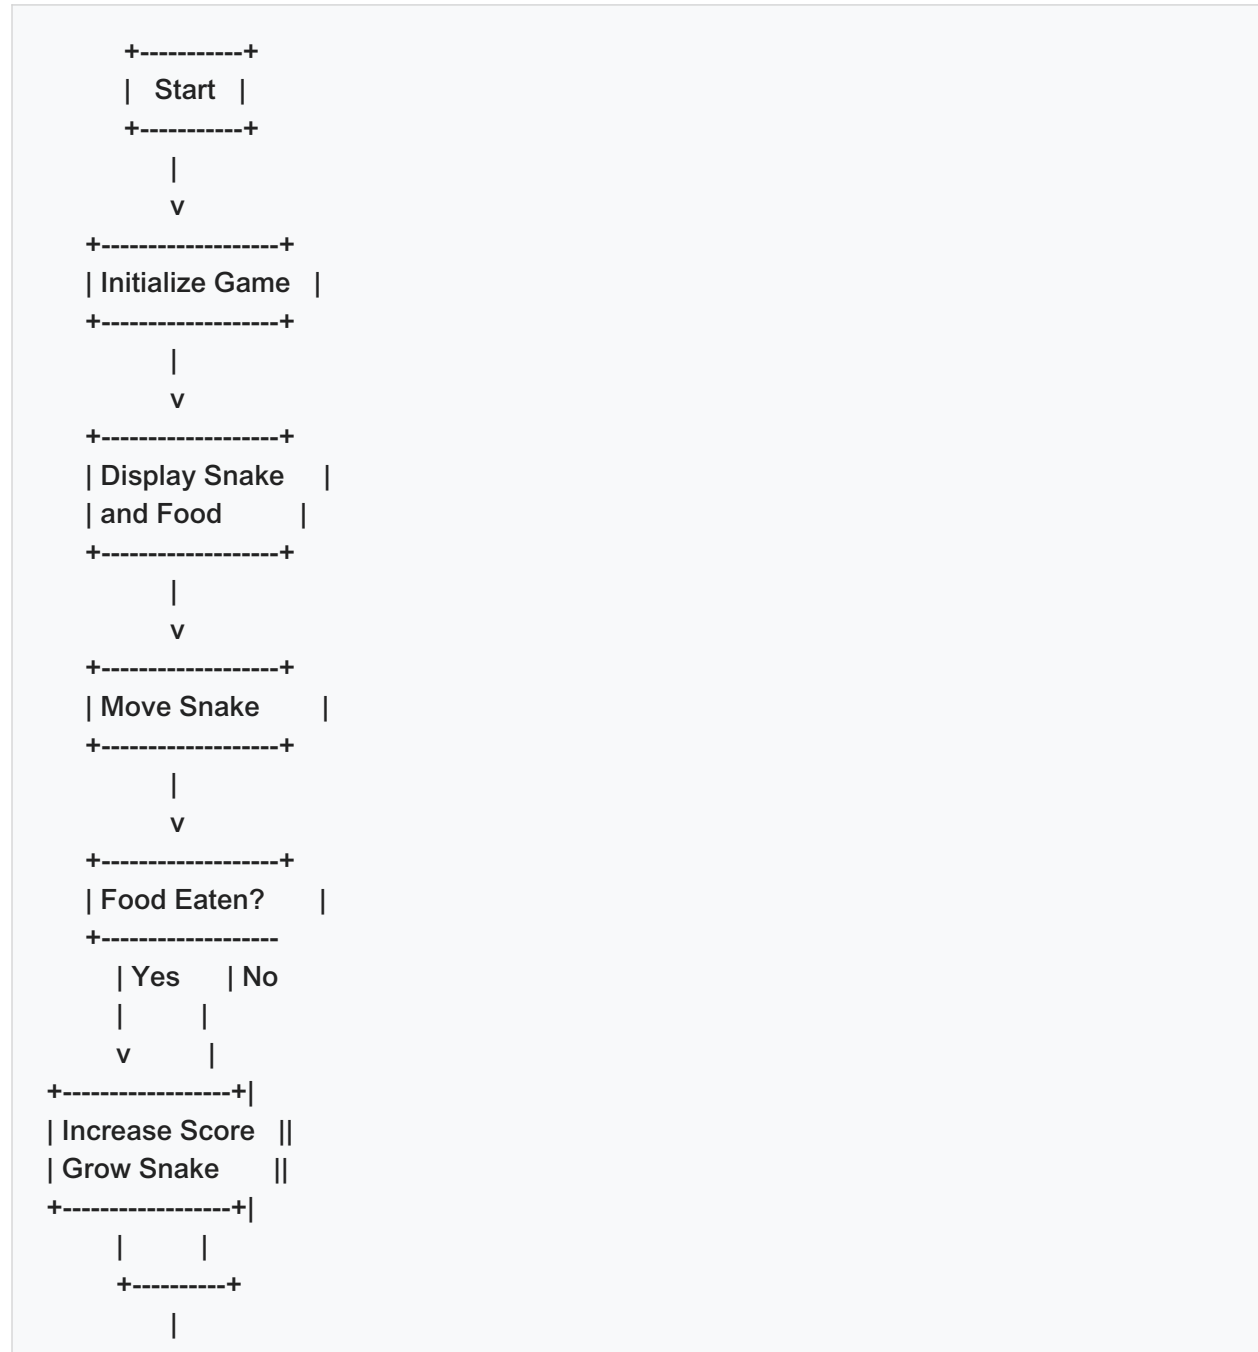

Course Code: CSE 2216

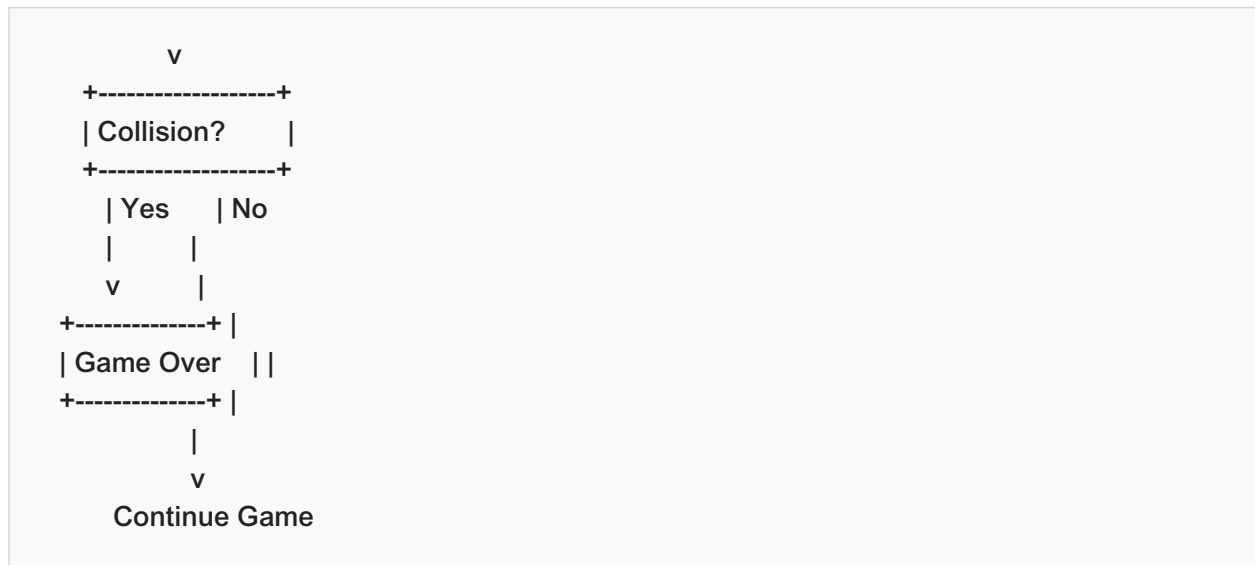

Submitted To: Vashkar Kar [VK]
Lecturer
Department of CSE

1. System Design

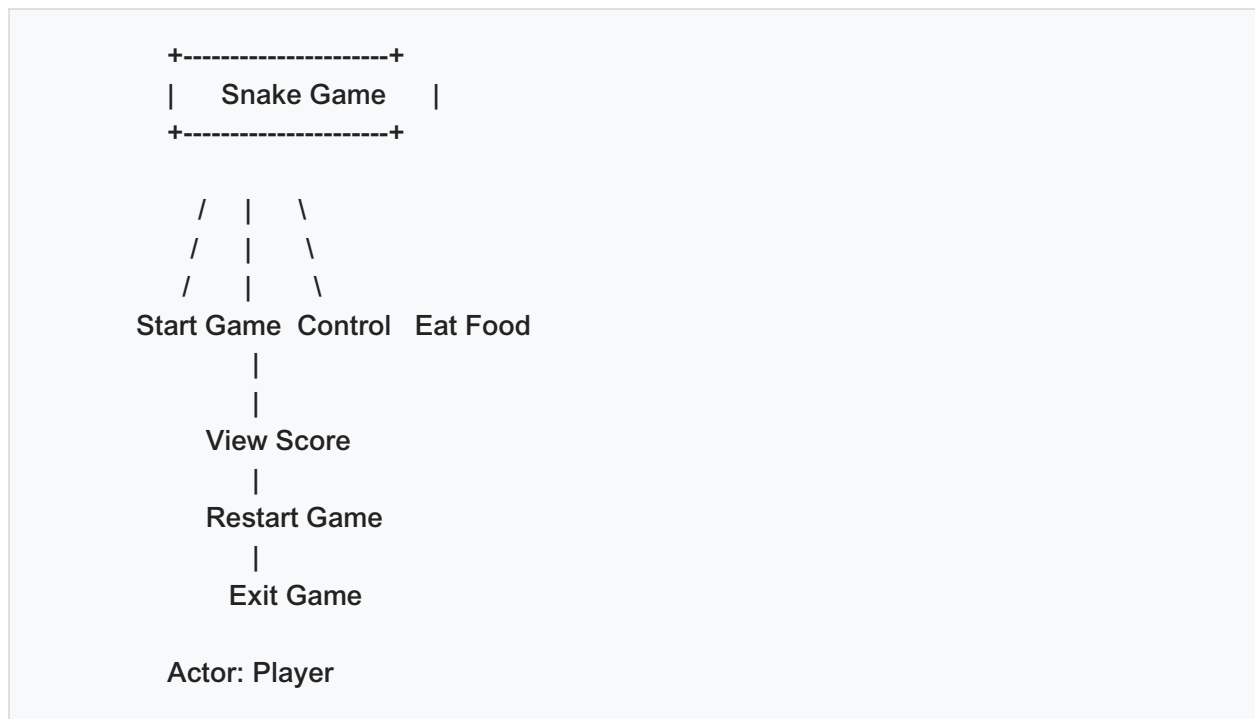

In this week, I designed the basic structure of the Snake Game. I planned how different parts of the game will work together. I also prepared the flowchart, use case diagram, class diagram, and user interface design before starting the coding part.

2. Flowchart

3. Use Case Diagram

4. Use Case Table

Actor	Action
Player	Start Game
Player	Control Snake
Player	Eat Food
Player	View Score
Player	Restart Game
Player	Exit Game

5. Class Diagram

6. User Interface Design (GUI Sketch)

7. Conclusion

In Week 3, I completed the basic system design of the Snake Game. I prepared the flowchart, use case diagram, class diagram, and user interface design. These designs will help me implement the game easily in the next development phase.
