Project: Snake Game

Week 1 Progress Report

Student Name: Bhuiyan Abdullah Al Rafe

Student ID: 11240321715

Course Title: Software Development I

Course Code: CSE 2216

Submitted To: Vashkar Kar [VK]
Lecturer
Department of CSE

1. Project Planning

In the first week, I selected the project topic and planned how I would develop the Snake Game. I decided to use Java and Java Swing and prepared a simple work plan.

2. Topic Approval

My project topic, 'Snake Game', was approved by my supervisor.

3. Project Objective

The objective of this project is to develop a simple Snake Game where the player controls a snake, collects food, increases the score, and avoids collisions with the walls and the snake's own body.

4. Project Scope

- Snake movement
- Keyboard controls
- Random food generation
- Score calculation
- Snake growth
- Wall collision detection
- Self-collision detection
- Game Over screen
- Restart option

5. Technology Used

- Programming Language: Java
- GUI Framework: Java Swing
- IDE: Apache NetBeans

6. Research

I watched videos and learned how the Snake Game works. I studied the basic game rules and the main features needed for the project.
